AGENTS. C. W. CRANE, 426 Montg'y st., San Francisco WM. GEDLING Bullionville T. STARR. Hamilton

DURATION OF HUMAN LIFE.—Professor Farsiay has given it as his opinion that all who die before they are a hundred years old may be justly charged with self-murder; that Providence, having originally intended man to live a century, would allow him to do so if he did not kill himself by eating unwholsome food, allowing himself to be annoyed by trifles, giving license to passion and exposing himself to accident. The French savant Flourin advanced the theory that the duration of life is measured by the time of growth. When the bones epiphysis are united the body grows no more, and it is at twenty years that this union is effected in man. The natural termination of life is five removes from the several points. Man, being twenty years in growing, lives, or should live fee they DUBATION OF HUMAN LIFE, - Professor is he removes from the several points. Man, being twenty years in growing, lives, or should live, five times twenty years; the horse is five years in growing, and lives twenty-five years; and so on with other animals.

CHLOROFORM. - We are indebted to the insect tribe for chloroform, one of the most powerful agents in alleviating pain.
The little ant contains a substance called formic acid, about which old John Ray forme seed, about which old John Ray and Martin Lesser corresponded a cen-tury ago; and they found it contained an acid, and so it got into the book as formic acid. It was found to contain a comacid, and so a go.

acid. It was found to contain a compound radical formyle, and three atoms
of oxygen. Dumas substituted chloroform for the oxygen, and thus obtained
formyle, which is chlorotrichloride of formyle, which is chlore form. Then the Americans found that other was capable of taking away all sensations of the human body, and Dr. Simpson of Edenburg found that trich-loride of formyle was more thoroughly adapted for this purpose than even ether. All this has arisen from a study of the habit of insects.
